

Registered Users can now *subscribe* to my **Newsletter**.

You only have to push the subscribe button (found on the right menu). Afterwards you will receive email with a confirmation link. As soon as you have confirmed your subscription, you will receive the next available newsletter automatically.

Of course you can *unsubscribe* to my newsletter whenever you want, just as easy as to subscribe. As soon as you have subscribed to my newsletter the subscribe button will change to unsubscribe.

Why is there a newsletter available? Well, I see that some registered users only come here every now and then. So I want them to be able to be up to date with my page and receive some news. I plan to send out a newsletter every 2 or 3 months. So I will not flood your mailbox.
